

Preliminary Scenario of a Few Paths of the Mapping the Human Cognome Project

(Prepared for the National Science Foundation Conference on Convergent Technologies (Nano-Bio-Info-Cogno) Dec. 3-4, 2001 by Robert E. Horn, Stanford University)

December 14, 2001
 To: Mike Rocco, Bill Bainbridge, National Science Foundation
 FROM: Bob Horn, Stanford Univ.
 As a continuation of our conversation, here's a rough draft of a small number of the possible improvements in human performance. They are based on convergences in a full-scale Mapping the Human Cognome project that I suggested at the meeting on December 3-4. The knowledge map itself is a prototype of a "scenario map." At your convenience, I look forward to exploring further mapping the whole project, as well as expanding on the idea of the human cognome.

Note: This scenario map is for illustrative purposes only. Not all convergences, causalities, and synergies have been shown.

Draft v.1
